Thank You for choosing the
Energizer Dock & Go™ Charger

Please read this manual before you use the charger, and save it for reference.

Batteries: Nickel Metal Hydride (NiMH) Rechargeable batteries
Sizes: AA and AAA
Recommended: Energizer NiMH Batteries

CHARGING

1. Load Batteries into a Pod
   - Open lid of charger pod.
   - Set to AA or AAA (Flip lever down for AAA).
   - Insert batteries to match the polarity marks (+ and -).

2. Plug in the Charger
   - Plug power adapter into a standard AC outlet.
   - Place pod in base.
   - Charger docking station charges one pod at a time.
   - When the first pod is fully charged, the second pod will begin charging automatically. LED indicates charging status.
   - LED glows: 
     - Red while charging
     - Amber (orange) while waiting
     - Green when complete
   - When charging is complete, the pod can be left on the dock or serve as a storage carrying case for the batteries.

   NOTE: This is a smart charger with a trickle charge function. Invert batteries in partially charged battery may charge more quickly than batteries which are fully charged.

   - If charging 2 batteries only, place them together either on the left or right side.

CHARGING TIME

<table>
<thead>
<tr>
<th>Battery Size</th>
<th>Rated Capacity (mAh)</th>
<th>Estimated Charging Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>AA</td>
<td>1200 - 2200</td>
<td>1.6 - 2.8 hr</td>
</tr>
<tr>
<td>AA</td>
<td>2500 - 2650</td>
<td>2.8 - 3.0 hr</td>
</tr>
<tr>
<td>AAA</td>
<td>850 - 1000</td>
<td>2.5 - 3.0 hr</td>
</tr>
</tbody>
</table>

The above table shows the charging time for one pod.

FEATURES

- Charges up to 8 NiMH AAAs or AAAs.
- Two portable charging pods - One keeps you going while the other pod always ready to go.
- Charger pods can be used for storage and travel, as well as charging.
- Worldwide voltage: 100-240V AC / 50-60 Hz
- Reverse polarity protection guards the charger and batteries from damage if batteries are placed incorrectly.

TIPS

- It is normal for batteries to warm up when charging. They will cool down after they are charged.
- Store batteries in a cool, dry place at room temperature.
- Rechargeable batteries gradually lose power when stored. If they are not used for a few weeks, "top them up" to be sure of a full charge.
- Not charging all the way?
  - Gently rub battery ends with a clean pencil eraser or cloth to remove any residue.
  - Try completely discharging them and completely charging them again.
- For Best Performance of your Energizer Rechargeable batteries.
  - Fully Charge your Rechargeable batteries before the first use.
  - Store batteries at room temperature under dry conditions

- Make sure you use a charger designed to charge NiMH batteries

RECOMMENDED DEVICE USAGE

Rechargeable batteries are ideal for high drain or frequently used devices (more than once a week) and can be charged 100% of time.
- NiMH batteries are a great economical power solution if used in Digital Cameras, MP3 Players, CD players, 2 Way Radios, Walkie Talkies, Remote Control Cars, Game Boys, Photoflash, equipment, Toys, Infant Devices and PDAs.
- NiMH batteries are not recommended for: Remote Controls & Clocks - use Alkaline batteries such as Energizer Max.
- Medical & Safety Devices (e.g. smoke detectors) unless they are specifically designed and recommended to use NiMH batteries.

WARNING

To reduce personal injury and property damage from, but not limited to, the risk of electric shock or fire:
- Charge only Nickel Metal Hydride (NiMH) rechargeable batteries. Charging any other types of batteries may cause them to leak, rupture or explode.
- Do not open battery, dispose of in fire, put in backwards, mix with used or other battery types or short circuit -- may ignite, explode, leak or get hot causing injury.
- Use the charger only in dry locations. Keep away from rain, snow or excessive moisture.
- Never plug battery chargers into an extension cord.
- Do not operate the charger if damaged.
- Do not disassemble, modify any part of the charger, or attempt to use the charger as a power source.
- Always unplug the charger from outlet before attempting maintenance or cleaning.

This appliance is not intended for use by children or infirm persons unless they have been adequately supervised by a responsible person to ensure that they can use the appliance safely. Young children should be supervised to ensure that they do not play with the appliance.

SPECIFICATIONS

Model: CHPC
Charges: AA NiMH batteries up to 2650mAh
AAA NiMH batteries up to 1000mAh
Input Voltage: Worldwide voltage: 100-240V AC 50 / 60Hz
Charging Current: 1.1A for AA, 0.4A for AAA

ONE YEAR WARRANTY

This Energizer product is warranted only to the original purchaser upon presentation of proof of purchase, to be free from defects in materials and workmanship for one year from date of original purchase provided that no other repairs, alterations or modifications had been attempted by unauthorized personnel. Not applicable to damage caused by normal wear and tear or misuse. Repair or replacement of charger at Energizer's option. For more information, please contact your nearest Energizer sales office.
