ELHD2A3

The ELHD2A3 has a wealth of high-tech features. An advanced Azoteq IQ Switch© incorporates pulse width modulation control, allowing adjustment from 100% light output for maximum brightness to 6% for maximum battery life. In addition, the light has a focusing mechanism to regulate the beam from a tight spot to a wide flood at the touch of a finger.

A dual convex shatterproof polycarbonate lens, protected by a poly(organo) siloxane coated lens, resists breakage and weathering. The battery packs slide easily onto the rear of the strap and the top strap is detachable.
