The Energizer® Micro Sport Headlight is an ideal lighting choice for activities in the dark, such as cycling and jogging. The forward beam lights your path, while the back safety flasher ensures that you can be seen. The light is water resistant and will continue to operate after exposure to splashing water from all directions. A comfortable, adjustable elastic band mounts the light securely around your head, and the slim profile and light weight make the headlight easy to wear.

**BRIGHT**
- 2 LEDs provide 37 lumens of light in high mode

**RELIABLE**
- Useable light for 3 ½ hours in high mode with Energizer® MAX® batteries
- Lifetime LEDs never need replacing

**POWERFUL**
- Illuminates objects up to 8 meters away in high mode with Energizer® MAX® batteries

**SAFE**
- Red rear flasher operates for 95 hours with just one Energizer® MAX® CR2032 coin cell

Before Using Your Flashlight:
Please read all instructions and cautionary markings on the package and light
