Compliance with Global Laws and Industry Standards

All Energizer and Eveready products are designed to meet or exceed the requirements of the various national and international industry battery and environmental standards. Energizer and Eveready products are routinely sampled and tested against applicable standards both internally and independently. In addition, Energizer representatives routinely participate in the development of global battery standards. The most notable standards Energizer and Eveready products meet or exceed are:

**International Electrotechnical Commission (IEC):** ([www.iec.ch](http://www.iec.ch))
- IEC 60086-1: Primary batteries - Part 1: General
- IEC 60086-2: Primary batteries - Part 2: Physical and electrical specifications
- IEC 60086-4: Primary batteries - Part 4: Safety of lithium batteries
- IEC 60086-5: Primary batteries - Part 5: Safety of batteries with aqueous electrolyte
- IEC 61951-2: Secondary cells and batteries containing non-acid electrolytes – Portable sealed rechargeable single cells – Part 2 Nickel-metal hydride
- IEC 61959: Secondary cells and batteries containing alkaline or other non-acid electrolytes – Mechanical tests for sealed portable secondary cells and batteries
- IEC 61960: Secondary cells and batteries containing alkaline or non-acid electrolytes – Secondary lithium cells and batteries for portable applications
- IEC 62133: Secondary cells and batteries containing alkaline or other non-acid electrolytes - Safety requirements for portable sealed secondary cells, and for batteries made from them, for use in portable applications
- IEC 62281: Safety of primary and secondary lithium cells and batteries during transport.

**American National Standards Institute (ANSI):** ([www.ansi.org](http://www.ansi.org)) / ([www.nema.org](http://www.nema.org))
- ANSI C18.1, Part 1, American National Standard For Portable Primary Cells and Batteries With Aqueous Electrolyte - General and Specifications
- American National Standards Institute (ANSI ) C18.3, Part 1, American National Standard for Portable Lithium Primary Cells and Batteries - General and Specifications
Other Notable Standards:

- American Society of Toy Manufacturers (ASTM) F 963. Consumer safety specification on toy safety
- Japanese Industrial Standard (JIS) C 8511. Alkaline primary cells and batteries

These standards represent a portion of the standards Energizer and Eveready products are tested against. For compliance with a standard not listed above, please contact your Energizer representative.
